ABOUT ME

Innovative and results-driven Senior Full Stack Developer with over 10 years of experience in building scalable, high-performance web and mobile applications. Skilled in delivering user-focused solutions for complex projects, with expertise in JavaScript, Angular, PHP Laravel, MySQL, and modern development practices. Passionate about integrating AI and automation to enhance user experience, improve efficiency, and optimize development workflows. Currently contributing to a product-based company with a strong focus on performance, usability, and maintainability.

PROFILE HIGHLIGHTS

- Over 10 years of experience in web and application development across product-based and service-oriented organizations.
 - 30 months of on-site project experience in Malaysia and Singapore, contributing directly to client-facing initiatives
- Full-stack developer with expertise in MySQL and web application development using JavaScript/TypeScript, Angular 14+, Angular Material, Ionic 5, PHP Laravel, React, Node.js, and RESTful APIs. Skilled in Stripe and other third-party API integrations. Experienced in application architecture and design, UI/UX prototyping with Photoshop, Illustrator, and Figma, and proficient in GitHub for managing workflows.
- Leverages AI tools like ChatGPT and GitHub Copilot to accelerate development and
- optimize processes. Experienced with AWS services including EC2, S3, and other core cloud deployment tools.
- Self-motivated and proactive in exploring new technologies, continuously learning
- and applying skills through personal projects to enhance problem-solving and software development expertise.
